Preface

The Job Accommodation Network (JAN) is funded by a contract with the Office of Disability Employment Policy, U.S. Department of Labor. JAN makes documents available with the understanding that the information be used solely for educational purposes. The information is not intended to be legal or medical advice. If legal or medical advice is needed, appropriate legal or medical services should be contacted.

JAN does not endorse or recommend any products or services mentioned in this publication. Although every effort is made to update resources, JAN encourages contacting product manufacturers/vendors and service providers directly to ensure that they meet the intended purposes. This guarantees that the most up-to-date information is obtained.

The following document is not copyrighted and reproduction is encouraged. Section 105 of the Copyright Law provides that no copyright protection is available for works created by the U.S. Government. Therefore, all works created by JAN fall under this provision. While individuals may use such work with impunity, individuals may not claim copyright in the original government work, only in the original material added. Individuals may access the full text of the law from the U.S. Copyright Office <https://www.loc.gov/copyright>. Please note that specific information cited by JAN may be copyrighted from other sources. Citing secondary sources from a JAN publication may violate another organization's or individual's copyright. Permission must be obtained from these sources on a case-by-case basis. When using JAN materials, JAN asks that the materials not be reproduced for profit, that the tone and substance of the information are not altered, and that proper credit is given to JAN as the source of the information. For further information regarding this or any other document provided by JAN, please contact JAN.

Updated 01/24/2019.

JAN'S Accommodation and Compliance Series

Introduction

JAN's Accommodation and Compliance Series is designed to help employers determine effective accommodations and comply with Title I of the Americans with Disabilities Act (ADA). Each publication in the series addresses a specific medical condition and provides information about the condition, ADA information, accommodation ideas, and resources for additional information.

The Accommodation and Compliance Series is a starting point in the accommodation process and may not address every situation. Accommodations should be made on a case by case basis, considering each employee's individual limitations and accommodation needs. Employers are encouraged to contact JAN to discuss specific situations in more detail.

For information on assistive technology and other accommodation ideas, visit JAN's Searchable Online Accommodation Resource (SOAR) at <https://askjan.org/soar>.

Information about Depression

Depression is an illness that involves feelings of sadness lasting for two weeks or longer, often accompanied by a loss of interest in life, hopelessness, and decreased energy. Such distressing feelings can affect one's ability to perform the usual tasks and activities of daily living. This is considered to be clinical depression. It is very different from a temporary case of "the blues" triggered by an unhappy event or stressful situation. Depression affects the mind, but this does not mean "it's all in your head."

Depression is a medical illness linked to changes in the biochemistry of the brain. Depression is not a weakness of character. Being depressed does not mean a person is inadequate. It means the person has a medical illness that is just as real as diabetes or ulcers. Like other medical disorders, clinical depression should not be ignored or dismissed. A clinically depressed person cannot simply "snap out of it" any more than a person with an ulcer could simply will it away.

JAN's [Effective Accommodation Practices \(EAP\) Series: Executive Functioning Deficits](#) is a publication detailing accommodations for individuals with limitations related to executive functioning. These ideas may be helpful in determining accommodations.

Depression and the Americans with Disabilities Act

The ADA does not contain a list of medical conditions that constitute disabilities. Instead, the ADA has a general definition of disability that each person must meet. A person has a disability if he/she has a physical or mental impairment that substantially

limits one or more major life activities, a record of such an impairment, or is regarded as having an impairment. For more information about how to determine whether a person has a disability under the ADA, see [How to Determine Whether a Person Has a Disability under the Americans with Disabilities Act Amendments Act \(ADAAA\)](#).

Accommodating Employees with Depression

People with depression may develop some of the limitations discussed below, but seldom develop all of them. Also, the degree of limitation will vary among individuals. Be aware that not all people with depression will need accommodations to perform their jobs and many others may only need a few accommodations. The following is only a sample of the possibilities available. Numerous other accommodation solutions may exist.

Questions to Consider:

1. What limitations is the employee experiencing?
2. How do these limitations affect the employee and the employee's job performance?
3. What specific job tasks are problematic as a result of these limitations?
4. What accommodations are available to reduce or eliminate these problems? Are all possible resources being used to determine possible accommodations?
5. Has the employee been consulted regarding possible accommodations?
6. Once accommodations are in place, would it be useful to meet with the employee to evaluate the effectiveness of the accommodations and to determine whether additional accommodations are needed?
7. Do supervisory personnel and employees need training?

Accommodation Ideas:

Limitations

Attentiveness/Concentration

- Alternative Lighting
- Applications (apps)
- Apps for Memory
- Behavior Modification Techniques
- Cubicle Doors, Shields, and Shades

- Electronic Organizers
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Full Spectrum or Natural Lighting Products
- Job Coaches
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Noise Canceling Headsets
- Sound Absorption and Sound Proof Panels
- Task Separation
- Telework, Work from Home, Working Remotely
- Timers and Watches
- Uninterrupted "Off" Work Time
- Verbal Cues
- Wall Calendars and Planners
- Worksite Redesign / Modified Workspace
- Written Instructions

Control of Anger/Emotions

- Apps for Miscellaneous Mental Health / Control of Anger & Emotions
- Behavior Modification Techniques
- Counseling/Therapy
- Disability Awareness/Etiquette Training
- Employee Assistance Program
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Job Restructuring
- Simulated Skylights and Windows
- Sun Boxes and Lights

- Supervisory Methods
- Support Animal
- Support Person

Decreased Stamina/Fatigue

- Aide/Assistant/Attendant
- Job Restructuring
- Periodic Rest Breaks
- Stand-lean Stools
- Telework, Work from Home, Working Remotely
- Worksite Redesign / Modified Workspace

Executive Functioning Deficits

- Apps for Concentration
- Checklists
- Color Coded System
- Cubicle Doors, Shields, and Shades
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Form Generating Software
- Job Coaches
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Noise Canceling Headsets
- Recorded Directives, Messages, Materials
- Sound Absorption and Sound Proof Panels
- Speech Recognition Software
- Timers and Watches
- Wall Calendars and Planners
- Written Instructions

Memory Loss

- Additional Training Time / Training Refreshers

- Apps for Memory
- Electronic Organizers
- Memory Software
- Recorded Directives, Messages, Materials
- Reminders
- Support Person
- Verbal Cues
- Wall Calendars and Planners
- Written Instructions

Organizing/Planning/Prioritizing

- Applications (apps)
- Apps for Organization/ Time Management
- Color-coded Manuals, Outlines, and Maps
- Electronic Organizers

Stress Intolerance

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Environmental Sound Machines / Tinnitus Maskers / White Noise Machines
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Supervisory Methods
- Support Animal
- Support Person

Work-Related Functions

Policies

- Additional Training Time / Training Refreshers

- Aide/Assistant/Attendant
- Flexible Schedule
- Marginal Functions
- Modified Break Schedule
- Periodic Rest Breaks
- Policy Modification
- Reassignment
- Service Animal
- Supervisory Methods
- Support Animal
- Telework, Work from Home, Working Remotely

Stress

- Apps for Anxiety and Stress
- Behavior Modification Techniques
- Counseling/Therapy
- Flexible Schedule
- Job Restructuring
- Marginal Functions
- Modified Break Schedule
- Monitor Mirrors
- On-site Mentoring
- Service Animal
- Simulated Skylights and Windows
- Supervisory Methods
- Support Animal
- Support Person
- Telework, Work from Home, Working Remotely
- Uninterrupted Work Time

Situations and Solutions:

An employee with major depression and bipolar disorder was having difficulties working in a busy central banking office.

He needed to manage a large staff of workers, provide customer service, and oversee the daily office management. As an accommodation he requested and received a transfer to a smaller and less busy branch office. The employee maintained his salary and the responsibilities of his leadership role.

A county employee who works in the property records room has bouts of depression that are intensified when he is busy, under deadlines, and has frequent interruptions.

He then finds it difficult to concentrate and get his work completed. The employer rescheduled a part-time worker to help during the busy times, allowing the employee to go to a specified desk behind a partition where he could concentrate more fully on the records he was responsible for.

A guidance counselor for a large high school experienced severe bouts of irritable bowel syndrome, depression, and fatigue as a result of fibromyalgia.

He experienced difficulty in opening the heavy doors to the entrance of the school and had to make frequent trips to the bathroom. The individual's employer complained that he was spending too much of his time away from his office and therefore was not available for students. The employer moved the employee's office to a location closer to the faculty restroom, added an automatic entry system to the main doors, and allowed flexible leave time so the employee could keep appointments with his therapist.

Jude, an applicant with a depression and anxiety, is applying for a customer service position that requires a pre-employment test.

Due to medication that Jude takes for both conditions, his processing speed is a bit slower. He feels he can only do his best on the test if he has the accommodations of extended time as well as taking the test in a private location to help limit distractions. In order for the employer to even consider those accommodations, the employee will need to disclose the mental health impairments and be prepared to provide medical documentation.

A customer service representative working in a call center was experiencing limitations associated with generalized anxiety disorder and depression.

He began treatment with a new healthcare provider who adjusted his medications and recommended bi-weekly counseling sessions for one month. He exhausted his accrued paid sick leave but was FMLA eligible. He applied FMLA leave intermittently in order to attend counseling appointments.

A construction worker had Huntington's disease related depression.

He requested ADA leave to get treatment and a reduced work schedule when he returned back to work, he was accommodated with leave and a modified schedule.

A middle school teacher with chronic depression asks for the accommodation of leave one afternoon a week for a sixteen-week period so she can attend an intensive out-patient therapy program recommended by her mental health practitioner.

The physician feels this treatment is necessary to prevent a depressive episode requiring further leave. Her employer finds no hardship in providing her with a substitute for those sixteen afternoons and provides the requested accommodation.

A driver with seasonal affective disorder (SAD) who picks up and delivers clients to various appointments began to forget waiting clients as well as the routes she needed to travel in order to deliver them to the appropriate facility.

When her employer mentioned the mistakes, the driver broke down. She described her depression and anxiety with the change of seasons and how it affected her memory. The use of reminder apps, as well as those to help with directions, were discussed as possible accommodation solutions.

An employee returning to work after a stroke was dealing with depression.

As a result, the employee's performance was impaired and the previous supervisory method was no longer effective. The supervisor agreed to meet with the employee weekly to discuss performance and conduct issues that were becoming problematic, as well as put accommodations into place. Among the accommodations: a flexible schedule for health care appointments, a diagram to help with the flow of duties, templates to assist in report writing, and a move to an area with more natural lighting.

An employer, trying to accommodate an employee returning to work after a leave, had questions about the stress of required travel that escalated the employee's depression and anxiety.

The employer was advised to continue on in the interactive process to discover what specifically about the travel was stressful so they could determine accommodations for those identified issues. Examples of questions to ask could include what particularly about the travel causes the stress that heightens the depression, such as the length of the travel, the distance, the planning process, or even specific modes of travel and/or locations.

An employee voluntarily admitted herself to a hospital inpatient unit due to severe depression.

Her mother called the employer to let them know what had happened and to tell them her return date was uncertain at that time. The employer provided leave under the ADA for the employee and requested her mother to keep them informed about the employee's progress and possible return to work date.

A grocery store bagger with seasonal affective disorder (SAD) had difficulty working an early schedule due to oversleeping.

She also experienced fatigue and depression during late fall and winter months. She was accommodated with an afternoon schedule and was moved to the front of the store, which had windows that let sunlight enter her workspace.

An electrician with severe depression needed to attend periodic licensure trainings.

The person had difficulty taking effective notes and paying attention in the meetings. The individual was accommodated with notes from remote Communication Access Realtime Translation (CART) service.

Products

There are numerous products that can be used to accommodate people with limitations. JAN's Searchable Online Accommodation Resource at <https://askjan.org/soar> is designed to let users explore various accommodation options. Many product vendor lists are accessible through this system; however, JAN provides these lists and many more that are not available on the Web site upon request. Contact JAN directly if you have specific accommodation situations, are looking for products, need vendor information, or are seeking a referral.
